Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: (26) in FIG. 5B. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 5, line 7, "antenna mounting face 11" should be changed to --antenna mounting face 21--.

Appropriate correction is required.

3. The disclosure is objected to because of the following informalities: on page 7, line 21, "spring fingers 24" should be changed to --spring fingers 22--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Cox (U.S. Patent No. 5,714,963).

Regarding claim 29, Cox teaches in figures 1-13 a mounting device comprising: a radio housing [12, 10] with a radio mounting face [20] including: a radio nose [15], and a locking ring [30] that is rotatably attached to the radio mounting face; and an antenna housing [11] with an antenna mounting face [18], including an antenna feed input [19a], wherein the radio nose is aligned with the antenna feed input, and the locking ring is secured to the antenna mounting face.

Regarding claim 30, Cox teaches in figures 1-13 the mounting device of claim 29, further comprising a plurality of ring tabs [60, 41] attached to the radio mounting face [20] that are displaced from the radio mounting face; wherein the radio mounting face [20] has a center, wherein the locking ring [30] is channel-shaped and is positioned adjacent to the radio mounting face, and the channel shaped locking ring has an opening that faces radially toward the center of the radio mounting face, and wherein the ring tabs extend radially away from the center of the radio mounting face and into the opening to hold the locking ring next to the radio mounting face (See FIG. 13).

Allowable Subject Matter

6. Claims 31-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for the allowance of claims 31-34 is the inclusion of the limitation of placement of a pin in the first pinholes positions the antenna for a first polarization direction or placement of the pin in the second pinholes positions the antenna for a second polarization direction. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
